

Science

In Science, we will be learning about plants and the best conditions to help plants to grow. Then later in the year, our topic will be Light.

History/Geography

Early in the Summer Term, we will continue to learn about the landscape of the UK and particularly our region, the North West. We will use maps, visits and non-fiction books as well as using our geographical skills to find out this information. As part of this topic, we will learn about rivers and find out why they are important now but also how they were used in the past. We will even go as far back as the Stone Age! We will then learn about the Four Ancient Civilisations and find out what they all have in common.

In our local history topic, we will be using the census and other historical resources to help us to discover what the cotton industry was like in Leigh in the past. We will be answering these enquiry question- Why were cotton mills important to our area? How was the cotton transported? What happened to all the cotton mills? We will also learn about the history of Twelve Apostles School and Church.

English

During the first half of the term, we will be reading some of the works by the amazing author Roald Dahl. First we will read, 'The Twits' and also some of his 'Revolting Rhymes' later in the term. We will be creating our own 'Twits' character and writing our own new chapter for the fantastic story (it might be a little bit naughty!) In Summer Term 2, we will be reading 'Bill's New Frock' and we will debate if we think boys should wear girls' clothes and vice versa.

Mathematics

This term we will measure and calculate capacity where the water used will help to keep the children cool in the sunny weather (hopefully!). Then we will look at shape and investigate turns and angles. Later in the Summer term, we will also continue to practise addition, subtraction, multiplication and division. The term will end with a Rockstar battle so keep up the practise on Times Tables Rockstars.

Religious Education

Our topics for this term will be learning all about the days after Jesus's resurrection and the days of Pentecost. Later in the term we will be learning about a variety of other religions such as Hinduism and Judaism, linking them to the Catholic religion.

DT

We will be learning all about sandwiches were the children will learn crucial skills such as chopping, slicing, grating and understanding the safety and food hygiene.

Summer 2026

Year 3

Class Teachers: Mr Ahmed

Teaching Assistants: Miss Stephenson
