

12th September 2020

Dear Parent/Carer,

We have been advised today that there has been 2 confirmed case of COVID-19 within the school. We have been working closely with Public Health England who have advised that the children and staff in year 3 and 4 bubbles isolate for 14 days from the last contact they had with the affected child/adult.

We are continuing to monitor the situation and work with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

The school remains open and providing your child remains well they can continue to attend school as normal. We will keep this under review. Siblings of the children in year 3 and 4 can attend unless anyone in their household develops symptoms.

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared.

All other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able can, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

A number of children that have developed symptoms over the last few days have been tested and are awaiting results. If your child tests positive, please contact school as soon as possible.

If your child or anyone in the household does develop symptoms, you can seek advice from NHS 111 at:

<https://www.nhs.uk/conditions/coronavirus-covid-19/symptoms/> or by phoning 111.

Through learning and loving we will follow Jesus.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19.

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information

Further Information Further information is available at:

I appreciate that these are challenging times and have valued your support throughout. Our priority is to keep everyone in our school community safe and well.

Kind Regards
Mrs Newton
