

XII Apostles RCPS Online Safety Policy

Date effective from	September 2025
Date of next review	September 2026
Review period	1Year
Status	Statutory
Person responsible	Mrs Whitton
Date ratified by Governing Body	3 rd October 2025
Version	1

XII APOSTLES ROMAN CATHOLIC PRIMARY SCHOOL

Online Safety Policy

Contents:

[Statement of intent](#)

1. [Legal framework](#)
2. [Roles and responsibilities](#)
3. [Managing online safety](#)
4. [Cyberbullying](#)
5. [Child-on-child sexual abuse and harassment](#)
6. [Grooming and exploitation](#)

13. [Use of smart technology](#)
14. [Educating parents](#)
15. [Internet access](#)
16. [Filtering and monitoring online activity](#)
17. [Network security](#)
18. [Emails](#)
19. [Generative artificial intelligence \(AI\)](#)
20. [The school website](#)
21. [Use of devices](#)
22. [Remote learning](#)
23. [Monitoring and review](#)

Statement of intent

Twelve Apostles understands that using online services is an important aspect of raising educational standards, promoting pupil achievement, and enhancing teaching and learning. The use of online services is embedded throughout the school; therefore, there are a number of controls in place to ensure the safety of pupils and staff.

The breadth of issues classified within online safety is considerable, but they can be categorised into four areas of risk:

- **Content:** Being exposed to illegal, inappropriate or harmful material, for example:
 - Pornography.
 - Racism.
 - Misogyny.
 - Self-harm.
 - Suicide.
 - Discrimination.
 - Radicalisation.
 - Extremism.
 - Misinformation.
 - Disinformation, including fake news.
 - Conspiracy theories.
- **Contact:** Being subjected to harmful online interaction with other users, for example:
 - Peer to peer pressure.
 - Commercial advertising.
 - Adults posing as children or young adults with the intention to groom or exploit children for sexual, criminal, financial or other purposes.
- **Conduct:** Personal online behaviour that increases the likelihood of, or causes, harm, for example:
 - Making, sending and receiving explicit messages.
 - Consensual and non-consensual sharing of nudes and semi-nudes.
 - Sharing of pornography.
 - Sharing other explicit images.
 - Online bullying.

- **Commerce:** Risks such as online gambling, inappropriate advertising, phishing and/or financial scams.

The measures implemented to protect pupils and staff will revolve around these areas of risk.

Our school has created this policy with the aim of ensuring appropriate and safe use of the internet and other digital technology devices by all pupils and staff.

Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Online Safety Act 2023
- Voyeurism (Offences) Act 2019
- The UK General Data Protection Regulation (UK GDPR)
- Data Protection Act 2018
- DfE (2025) 'Filtering and monitoring standards for schools and colleges'
- DfE (2021) 'Harmful online challenges and online hoaxes'
- DfE (2025) 'Keeping children safe in education 2025' (KCSIE)
- DfE (2023) 'Teaching online safety in school'
- DfE (2022) 'Searching, screening and confiscation'
- DfE (2025) 'Generative artificial intelligence in education'
- Department for Digital, Culture, Media and Sport and UK Council for Internet Safety (2024) 'Sharing nudes and semi-nudes: advice for education settings working with children and young people (updated March 2024)'
- UK Council for Child Internet Safety (2020) 'Education for a Connected World – 2020 edition'
- National Cyber Security Centre (2020) 'Small Business Guide: Cyber Security'

This policy operates in conjunction with the following school policies:

- Class Dojo Policy
- Allegations of Abuse Against Staff Policy
- Technology Acceptable Use Agreement
- Cyber-security Policy
- Cyber Response and Recovery Plan
- Child Protection and Safeguarding Policy
- Anti-Bullying Policy
- Staff Code of Conduct

- Behaviour Policy
- Disciplinary Policy and Procedure
- Data Protection Policy
- Photography and Images Policy
- Device User Agreement
- Staff ICT and Electronic Devices Policy
- Prevent Duty Policy
- Remote Education Policy
- Safe Use of AI Policy

Roles and responsibilities

The governing board will be responsible for:

- Ensuring that this policy is effective and complies with relevant laws and statutory guidance.
- Ensuring the DSL's remit covers online safety.
- Reviewing this policy on an annual basis.
- Ensuring their own knowledge of online safety issues is up-to-date.
- Ensuring all staff undergo safeguarding and child protection training, including online safety, at induction and at regular intervals.
- Ensuring that there are appropriate filtering and monitoring systems in place.
- Ensuring that the effectiveness of filtering and monitoring systems is reviewed at least annually in liaison with ICT staff and service providers.
- Ensuring that the SLT and other relevant staff have an awareness and understanding of the filtering and monitoring provisions in place, and manage them effectively and know how to escalate concerns when identified.
- Ensuring that all relevant school policies have an effective approach to planning for, and responding to, online challenges and hoaxes embedded within them.
- Ensuring compliance with the DfE's 'Meeting digital and technology standards in schools and colleges', with particular regard to the filtering and monitoring standards in relation to safeguarding.

The headteacher will be responsible for:

- Ensuring that online safety is a running and interrelated theme throughout the school's policies and procedures, including in those related to the curriculum, teacher training and safeguarding.
- Supporting the deputy DSL by ensuring they have enough time and resources to carry out their responsibilities in relation to online safety.
- Ensuring staff receive regular, up-to-date and appropriate online safety training and information as part of their induction and safeguarding training.
- Ensuring online safety practices are audited and evaluated.
- Organising engagement with parents to keep them up-to-date with current online safety issues and how the school is keeping pupils safe.
- Working with the DSL and ICT technicians to conduct termly light-touch reviews of this policy.
- Working with the Deputy DSL and governing board to update this policy on an annual basis.
- Identifying and assigning roles and responsibilities to manage the school's filtering and monitoring systems.
- Appointing an SLT digital lead in line with the Cyber-security Policy.

The Deputy DSL will be responsible for:

- Taking the lead responsibility for online safety in the school.
- Undertaking training so they understand the risks associated with online safety and can recognise additional risks that pupils with SEND face online.
- Liaising with relevant members of staff on online safety matters, e.g. the SENCO and ICT technicians.
- Ensuring online safety is recognised as part of the school's safeguarding responsibilities and that a coordinated approach is implemented.
- Ensuring safeguarding is considered in the school's approach to remote learning.
- Establishing a procedure for reporting online safety incidents and inappropriate internet use, both by pupils and staff, and ensuring all members of the school community understand this procedure.
- Understanding the filtering and monitoring processes in place at the school.
- Providing specialist knowledge in relation to filtering system management, e.g. the content and websites pupils should and should not be able to access.

- Ensuring that all safeguarding training given to staff includes an understanding of the expectations, roles and responsibilities in relation to filtering and monitoring systems at the school.
- Maintaining records of reported online safety concerns as well as the actions taken in response to concerns.
- Monitoring online safety incidents to identify trends and any gaps in the school's provision, and using this data to update the school's procedures.
- Reporting to the governing board about online safety on a termly basis.
- Working with the headteacher and ICT technicians to conduct half-termly light-touch reviews of this policy.
- Working with the headteacher and governing board to update this policy on an annual basis.

ICT technicians will be responsible for:

- Providing technical support in the development and implementation of the school's online safety policies and procedures.
- Implementing appropriate security measures as directed by the headteacher.
- Ensuring that the school's filtering and monitoring systems are updated as appropriate.
- Working with the DSL and headteacher to conduct termly light-touch reviews of this policy.
- Providing specialist support in relation to the implementation of filtering and monitoring software.

All staff members will be responsible for:

- Taking responsibility for the security of ICT systems and electronic data they use or have access to.
- Modelling good online behaviours.
- Maintaining a professional level of conduct in their personal use of technology.
- Having an awareness of online safety issues.
- Ensuring they are familiar with, and understand, the indicators that pupils may be unsafe online.
- Reporting concerns in line with the school's reporting procedure.
- Where relevant to their role, ensuring online safety is embedded in their teaching of the curriculum.

Pupils will be responsible for:

- Adhering to the Acceptable Use Agreement and other relevant policies.
- Seeking help from school staff if they are concerned about something they or a peer have experienced online.
- Reporting online safety incidents and concerns in line with the procedures within this policy.

Managing online safety

All staff will be aware that technology is a significant component in many safeguarding and wellbeing issues affecting young people, particularly owing to the rise of social media and the increased prevalence of children using the internet.

The Deputy DSL has overall responsibility for the school's approach to online safety, with support from deputies and the headteacher where appropriate, and will ensure that there are strong processes in place to handle any concerns about pupils' safety online. The DSL should liaise with the police or children's social care services for support responding to harmful online sexual behaviour.

The importance of online safety is integrated across all school operations in the following ways:

- Staff and governors receive regular training
- Staff receive regular email updates regarding online safety information and any changes to online safety guidance or legislation
- Online safety is integrated into learning throughout the curriculum
- All Computing lessons begin with SMART (Safe, Meet, Accept, Reliable, Tell) rules recap
- Representatives from the Complex Safeguarding team are invited to school to share information about keeping safe online
- Online Safety Day is celebrated on a yearly basis
- Assemblies are conducted termly on the topic of remaining safe online

Handling online safety concerns

Any disclosures made by pupils to staff members about online abuse, harassment or exploitation, whether they are the victim or disclosing on behalf of another child, will be handled in line with the Child Protection and Safeguarding Policy.

Staff will be aware that harmful online sexual behaviour can progress on a continuum, and appropriate and early intervention can prevent abusive behaviour in the future. Staff will also acknowledge that pupils displaying this type of behaviour are often victims of abuse themselves and should be suitably supported.

The victim of online harmful sexual behaviour may ask for no one to be told about the abuse. The DSL will consider whether sharing details of the abuse would put the victim in a more harmful position, or whether it is necessary in order to protect them from further harm. Ultimately the DSL will balance the victim's wishes against their duty to protect the victim and other young people. The DSL and other appropriate staff members will meet with the victim's parents to discuss the safeguarding measures that are being put in place to support their child and how the report will progress.

Confidentiality will not be promised, and information may be still shared lawfully, for example, if the DSL decides that there is a legal basis under UK GDPR such as the public task basis whereby it is in the public interest to share the information. If the decision is made to report abuse to children's social care or the police against the victim's wishes, this must be handled extremely carefully – the reasons for sharing the information should be explained to the victim and appropriate specialised support should be offered.

Concerns regarding a staff member's online behaviour are reported to the headteacher, who decides on the best course of action in line with the relevant policies. If the concern is about the headteacher, it is reported to the chair of governors.

Concerns regarding a pupil's online behaviour are reported to the DSL, who investigates concerns with relevant staff members, e.g. the headteacher and ICT technicians, and manages concerns in accordance with relevant policies depending on their nature, e.g. the Behaviour Policy and Child Protection and Safeguarding Policy.

Where there is a concern that illegal activity has taken place, the headteacher contacts the police.

The school avoids unnecessarily criminalising pupils, e.g. calling the police, where criminal behaviour is thought to be inadvertent and as a result of ignorance or normal developmental curiosity, e.g. a pupil has taken and distributed indecent imagery of themselves. The DSL will decide in which cases this response is appropriate and will manage such cases in line with the Child Protection and Safeguarding Policy.

All online safety incidents and the school's response are recorded by the DSL.

Cyberbullying

Cyberbullying can include, but is not limited to, the following:

- Threatening, intimidating or upsetting text messages
- Threatening or embarrassing pictures and video clips sent via mobile phone cameras
- Silent or abusive phone calls or using the victim's phone to harass others, to make them think the victim is responsible
- Threatening or bullying emails, possibly sent using a pseudonym or someone else's name
- Unpleasant messages sent via instant messaging

- Unpleasant or defamatory information posted to blogs, personal websites and social networking sites, e.g. Facebook
- Abuse between young people in intimate relationships online i.e. teenage relationship abuse
- Discriminatory bullying online i.e. homophobia, racism, misogyny/misandry.

The school will be aware that certain pupils can be more at risk of abuse and/or bullying online, such as LGBTQ+ pupils and pupils with SEND.

Cyberbullying against pupils or staff is not tolerated under any circumstances. Incidents of cyberbullying are dealt with quickly and effectively wherever they occur in line with the Anti-bullying Policy.

Child-on-child sexual abuse and harassment

Pupils may also use the internet and technology as a vehicle for sexual abuse and harassment. Staff will understand that this abuse can occur both in and outside of school, off and online, and will remain aware that pupils are less likely to report concerning online sexual behaviours, particularly if they are using websites that they know adults will consider to be inappropriate for their age.

The following are examples of online harmful sexual behaviour of which staff will be expected to be aware:

- Threatening, facilitating or encouraging sexual violence
- Upskirting, i.e. taking a picture underneath a person's clothing without consent and with the intention of viewing their genitals, breasts or buttocks
- Sexualised online bullying, e.g. sexual jokes or taunts
- Unwanted and unsolicited sexual comments and messages
- Consensual or non-consensual sharing of sexualised imagery
- Abuse between young people in intimate relationships online, i.e. teenage relationship abuse

All staff will be aware of and promote a zero-tolerance approach to sexually harassing or abusive behaviour, and any attempts to pass such behaviour off as trivial or harmless. Staff will be aware that allowing such behaviour could lead to a school culture that normalises abuse and leads to pupils becoming less likely to report such conduct.

Staff will be aware that creating, possessing, and distributing indecent imagery of other children, i.e. individuals under the age of 18, is a criminal offence, even where the imagery is created, possessed, and distributed with the permission of the child depicted, or by the child themselves.

The school will be aware that interactions between the victim of online harmful sexual behaviour and the alleged perpetrator(s) are likely to occur over social media following the initial report, as well as interactions with other pupils taking “sides”, often leading to repeat harassment. The school will respond to these incidents in line with the Child-on-child Abuse Policy and the Social Media Policy.

The school will respond to all concerns regarding online child-on-child sexual abuse and harassment, regardless of whether the incident took place on the school premises or using school-owned equipment. Concerns regarding online child-on-child abuse will be reported to the DSL, who will investigate the matter in line with the Child-on-child Abuse Policy and the Child Protection and Safeguarding Policy.

Grooming and exploitation

Grooming is defined as the situation whereby an adult builds a relationship, trust and emotional connection with a child with the intention of manipulating, exploiting and/or abusing them.

Staff will be aware that grooming often takes place online and that pupils who are being groomed are commonly unlikely to report this behaviour for many reasons, e.g. the pupil may have been manipulated into feeling a strong bond with their groomer and may have feelings of loyalty, admiration, or love, as well as fear, distress and confusion.

Due to the fact pupils are less likely to report grooming than other online offences, it is particularly important that staff understand the indicators of this type of abuse. The DSL will ensure that online safety training covers online abuse, the importance of looking for signs of grooming, and what the signs of online grooming are, including:

- Being secretive about how they are spending their time online.
- Having an older boyfriend or girlfriend, usually one that does not attend the school and whom their close friends have not met.
- Having money or new possessions, e.g. clothes and technological devices, that they cannot or will not explain.

Child sexual exploitation (CSE) and child criminal exploitation (CCE)

Although CSE often involves physical sexual abuse or violence, online elements may be prevalent, e.g. sexual coercion and encouraging children to behave in sexually inappropriate ways through the internet. In some cases, a pupil may be groomed online to become involved in a wider network of exploitation, e.g. the production of child pornography or forced child prostitution and sexual trafficking.

CCE is a form of exploitation in which children are forced or manipulated into committing crimes for the benefit of their abuser, e.g. drug transporting, shoplifting and serious violence. While these crimes often take place in person, it is increasingly common for children to be groomed and manipulated into participating through the internet.

Where staff have any concerns about pupils with relation to CSE or CCE, they will bring these concerns to the DSL without delay, who will manage the situation in line with the Child Protection and Safeguarding Policy.

Radicalisation

Radicalisation is the process by which a person comes to support terrorism and extremist ideologies associated with terrorist groups. This process can occur through direct recruitment, e.g. individuals in extremist groups identifying, targeting and contacting young people with the intention of involving them in terrorist activity, or by exposure to violent ideological propaganda. Children who are targets for radicalisation are likely to be groomed by extremists online to the extent that they believe the extremist has their best interests at heart, making them more likely to adopt the same radical ideology.

Staff members will be aware of the factors which can place certain pupils at increased vulnerability to radicalisation, as outlined in the Prevent Duty Policy. Staff will be expected to exercise vigilance towards any pupils displaying indicators that they have been, or are being, radicalised.

Where staff have a concern about a pupil relating to radicalisation, they will report this to the DSL without delay, who will handle the situation in line with the Prevent Duty Policy.

Mental health

Staff will be aware that online activity both in and outside of school can have a substantial impact on a pupil's mental state, both positively and negatively. The DSL will ensure that training is available to help ensure that staff members understand popular social media sites and terminology, the ways in which social media and the internet in general can impact mental health, and the indicators that a pupil is suffering from challenges in their mental health. Concerns about the mental health of a pupil will be dealt with in line with the Social, Emotional and Mental Health (SEMH) Policy.

Online hoaxes and harmful online challenges

For the purposes of this policy, an “**online hoax**” is defined as a deliberate lie designed to seem truthful, normally one that is intended to scaremonger or to distress individuals who come across it, spread on online social media platforms.

For the purposes of this policy, “**harmful online challenges**” refers to challenges that are targeted at young people and generally involve users recording themselves participating in an online challenge, distributing the video through social media channels and daring others to do the same. Although many online challenges are harmless, an online challenge becomes harmful when it could potentially put the participant at risk of harm, either directly as a result of partaking in the challenge itself or indirectly as a result of the distribution of the video online – the latter will usually depend on the age of the pupil and the way in which they are depicted in the video.

Where staff suspect there may be a harmful online challenge or online hoax circulating amongst pupils in the school, they will report this to the DSL immediately.

The DSL will conduct a case-by-case assessment for any harmful online content brought to their attention, establishing the scale and nature of the possible risk to pupils, and whether the risk is one that is localised to the school or the local area, or whether it extends more widely across the country. Where the harmful content is prevalent mainly in the local area, the DSL will consult with the LA about whether quick local action can prevent the hoax or challenge from spreading more widely.

Prior to deciding how to respond to a harmful online challenge or hoax, the DSL and the headteacher will decide whether each proposed response is:

- In line with any advice received from a known, reliable source, e.g. the UK Safer Internet Centre, when fact-checking the risk of online challenges or hoaxes.
- Careful to avoid needlessly scaring or distressing pupils.
- Not inadvertently encouraging pupils to view the hoax or challenge where they would not have otherwise come across it, e.g. where content is explained to younger pupils but is almost exclusively being shared amongst older pupils.
- Proportional to the actual or perceived risk.
- Helpful to the pupils who are, or are perceived to be, at risk.
- Appropriate for the relevant pupils' age and developmental stage.
- Supportive.
- In line with the Child Protection and Safeguarding Policy.

Where the DSL's assessment finds an online challenge to be putting pupils at risk of harm, they will ensure that the challenge is directly addressed to the relevant pupils, e.g. those within a particular age range that is directly affected or individual pupils at risk where appropriate.

The DSL and headteacher will only implement a school-wide approach to highlighting potential harms of a hoax or challenge when the risk of needlessly increasing pupils' exposure to the risk is considered and mitigated as far as possible.

Cyber-crime

Cyber-crime is criminal activity committed using computers and/or the internet. There are two key categories of cyber-crime:

- **Cyber-enabled** – these crimes can be carried out offline; however, are made easier and can be conducted at higher scales and speeds online, e.g. fraud, purchasing and selling of illegal drugs, and sexual abuse and exploitation.

- **Cyber-dependent** – these crimes can only be carried out online or by using a computer, e.g. making, supplying or obtaining malware, illegal hacking, and ‘booting’, which means overwhelming a network, computer or website with internet traffic to render it unavailable.

The school will factor into its approach to online safety the risk that pupils with a particular affinity or skill in technology may become involved, whether deliberately or inadvertently, in cyber-crime. Where there are any concerns about a pupil’s use of technology and their intentions with regard to using their skill and affinity towards it, the DSL will consider a referral to the Cyber Choices programme, which aims to intervene where children are at risk of committing cyber-crime and divert them to a more positive use of their skills and interests.

The DSL and headteacher will ensure that pupils are taught, throughout the curriculum, how to use technology safely, responsibly and lawfully.

Online safety training for staff

The DSL will ensure that all safeguarding training given to staff includes elements of online safety, including how the internet can facilitate abuse and exploitation, and understanding the expectations, roles and responsibilities relating to filtering and monitoring systems. All staff will be made aware that pupils are at risk of abuse, by their peers and by adults, online as well as in person, and that, often, abuse will take place concurrently via online channels and in daily life.

Staff training will include a specific focus on harmful online narratives such as misinformation, disinformation, and conspiracy theories, helping staff to recognise the signs of influence or vulnerability among pupils.

Training will equip staff with the knowledge and confidence to identify signs of online harm, respond appropriately to disclosures or concerns, and support pupils in developing critical thinking skills and safe online behaviours.

Staff will also be guided on how to embed online safety themes across the wider curriculum, promoting a consistent, whole-school approach to digital safeguarding.

Online safety and the curriculum

Online safety is embedded throughout the curriculum; however, it is particularly addressed in the following subjects:

- Curriculum for Life
- PSHE
- Computing

Online safety teaching is always appropriate to pupils’ ages and developmental stages.

Pupils are taught the underpinning knowledge and behaviours that can help them to navigate the online world safely and confidently regardless of the device, platform or app they are using. The

underpinning knowledge and behaviours pupils learn through the curriculum include the following:

- How to evaluate what they see online
- How to recognise techniques used for persuasion
- Acceptable and unacceptable online behaviour
- How to identify online risks
- How and when to seek support
- Knowledge and behaviours that are covered in the government's online media literacy strategy

The online risks pupils may face online will always be considered when developing the curriculum.

The school's approach to teaching online safety in the curriculum will reflect the ever-evolving nature of online risks, ensuring pupils develop the knowledge and resilience to navigate digital spaces safely and responsibly. Online safety education will address four key categories of risk: content, contact, conduct, and commerce.

Content Risks

Pupils will be taught how to critically evaluate online content and identify material that is illegal, inappropriate, or harmful. The curriculum will include discussions around harmful content such as pornography, racism, misogyny, self-harm, suicide, anti-Semitism, radicalisation, extremism, misinformation, disinformation (including fake news), and conspiracy theories. Lessons will equip pupils with the skills to question sources, verify information, and understand the dangers of engaging with such content.

Contact Risks

The school will educate pupils about the potential dangers of interacting with others online. Pupils will explore topics such as peer pressure, commercial exploitation, and grooming tactics used by adults who pose as children or young adults. They will learn how to recognise unsafe interactions, use privacy settings effectively, and report any concerning behaviour or messages to trusted adults and platforms.

Conduct Risks

Pupils will be guided on how their own online behaviour can impact both themselves and others. The curriculum will address the risks associated with creating, sharing, or receiving explicit images, including both consensual and non-consensual exchanges of nudes and semi-nudes. Online bullying, including the use of social media and messaging platforms to harass or intimidate others, will also be a key focus. Pupils will be taught responsible digital conduct and the legal and emotional consequences of harmful behaviour.

Commerce Risks

The curriculum will also include education on online commercial risks. Pupils will be informed about the dangers of online gambling, exposure to inappropriate advertising, and financial scams such as phishing. They will learn how to recognise fraudulent schemes, protect their personal and financial information, and seek help when confronted with suspicious online activity.

The DSL will be involved with the development of the school's online safety curriculum. Pupils will be consulted on the online safety curriculum, where appropriate, due to their unique knowledge of the kinds of websites they and their peers frequent and the kinds of behaviours in which they engage online.

Relevant members of staff, e.g. the SENCO and designated teacher for LAC, will work together to ensure the curriculum is tailored so that pupils who may be more vulnerable to online harms, e.g. pupils with SEND and LAC, receive the information and support they need.

The school will also endeavour to take a more personalised or contextualised approach to teaching about online safety for more susceptible children, and in response to instances of harmful online behaviour from pupils.

Class teachers will review external resources prior to using them for the online safety curriculum, to ensure they are appropriate for the cohort of pupils.

External visitors may be invited into school to help with the delivery of certain aspects of the online safety curriculum. The headteacher and DSL will decide when it is appropriate to invite external groups into school and ensure the visitors selected are appropriate.

Before conducting a lesson or activity on online safety, the class teacher and DSL will consider the topic that is being covered and the potential that pupils in the class have suffered or may be suffering from online abuse or harm in this way. The DSL will advise the staff member on how to best support any pupil who may be especially impacted by a lesson or activity. Lessons and activities will be planned carefully so they do not draw attention to a pupil who is being or has been abused or harmed online, to avoid publicising the abuse.

During an online safety lesson or activity, the class teacher will ensure a safe environment is maintained in which pupils feel comfortable to say what they feel and ask questions, and are not worried about getting into trouble or being judged.

If a staff member is concerned about anything pupils raise during online safety lessons and activities, they will make a report in line with the Child Protection and Safeguarding Policy.

If a pupil makes a disclosure to a member of staff regarding online abuse following a lesson or activity, the staff member will follow the reporting procedure outlined in the Child Protection and Safeguarding Policy.

Use of technology in the classroom

A wide range of technology will be used during lessons, including the following:

- Laptops
- I Pads

Prior to using any websites, tools, apps or other online platforms in the classroom, or recommending that pupils use these platforms at home, the class teacher will review and evaluate the resource. Class teachers will ensure that any internet-derived materials are used in line with copyright law.

Pupils will be supervised when using online materials during lesson time – this supervision is suitable to their age and ability.

Use of smart technology

While the school recognises that the use of smart technology can have educational benefits, there are also a variety of associated risks which the school will ensure it manages.

Pupils will be educated on the acceptable and appropriate use of personal devices and will use technology in line with the school's Technology Acceptable Use Agreement for Pupils.

Staff will use all smart technology and personal technology in line with the school's Staff ICT and Electronic Devices Policy.

The school recognises that pupils' unlimited and unrestricted access to the internet via mobile phone networks means that some pupils may use the internet in a way which breaches the school's acceptable use of ICT agreement for pupils.

Inappropriate use of smart technology may include:

- Using mobile and smart technology to sexually harass, bully, troll or intimidate peers.
- Sharing indecent images, both consensually and non-consensually.
- Viewing and sharing pornography and other harmful content.

Pupils will not be permitted to use smart devices or any other personal technology whilst in school.

Where there is a significant problem with the misuse of smart technology among pupils, the school will discipline those involved in line with the school's Behaviour Policy.

The school will hold assemblies, where appropriate, which address any specific concerns related to the misuse of smart technology and outline the importance of using smart technology in an appropriate manner.

The school will seek to ensure that it is kept up to date with the latest devices, platforms, apps, trends and related threats.

The school will consider the 4Cs (content, contact, conduct and commerce) when educating pupils about the risks involved with the inappropriate use of smart technology and enforcing the appropriate disciplinary measures.

Educating parents

The school will work in partnership with parents to ensure pupils stay safe online at school and at home. Parents will be provided with information about the school's approach to online safety and their role in protecting their children. Parents will be sent a copy of the Acceptable Use Agreement at the beginning of each academic year and are encouraged to go through this with their child to ensure their child understands the document and the implications of not following it.

Parents will be made aware of the various ways in which their children may be at risk online, including, but not limited to:

- Child sexual abuse, including grooming.
- Exposure to radicalising content.
- Sharing of indecent imagery of pupils, e.g. sexting.
- Cyberbullying.
- Exposure to age-inappropriate content, e.g. pornography.
- Exposure to harmful content, e.g. content that encourages self-destructive behaviour.

Parents will be informed of the ways in which they can prevent their child from accessing harmful content at home, e.g. by implementing parental controls to block age-inappropriate content.

Parental awareness regarding how they can support their children to be safe online will be raised in the following ways:

- Parents' evenings
- Twilight training sessions
- Newsletters
- Online resources

Internet access

Pupils, staff and other members of the school community will only be granted access to the school's internet network once they have read and signed the Acceptable Use Agreement. A record will be kept of users who have been granted internet access in the school office.

All members of the school community will be encouraged to use the school's internet network, instead of 3G, 4G and 5G networks, as the network has appropriate filtering and monitoring to ensure individuals are using the internet appropriately.

Filtering and monitoring online activity

The governing board will ensure the school's ICT network has appropriate filters and monitoring systems in place and that it is meeting the DfE's '[Filtering and monitoring standards for schools and colleges](#)'. The governing board will ensure 'over blocking' does not lead to unreasonable restrictions as to what pupils can be taught with regards to online teaching and safeguarding. The headteacher and ICT technicians will undertake a risk assessment to determine what filtering and monitoring systems are required. The filtering and monitoring systems will be scaled appropriately to meet the safeguarding needs of all pupils. ICT technicians will undertake regular checks on the filtering and monitoring systems to ensure they are effective and appropriate.

School uses SOPHOS for filtering and fire wall protection.

The DSL will ensure that specific roles and responsibilities are identified and assigned to manage filtering and monitoring systems and to ensure they meet the school's safeguarding needs.

Requests regarding making changes to the filtering system will be directed to the headteacher. Prior to making any changes to the filtering system, ICT technicians and the DSL will conduct a risk assessment. Any changes made to the system will be recorded by ICT technicians. Reports of inappropriate websites or materials will be made to an ICT technician immediately, who will investigate the matter and makes any necessary changes.

Deliberate breaches of the filtering system will be reported to the DSL and ICT technicians, who will escalate the matter appropriately. If a pupil has deliberately breached the filtering system, they will be disciplined in line with the Behaviour Policy. If a member of staff has deliberately breached the filtering system, they will be disciplined in line with the Disciplinary Policy and Procedure.

If material that is believed to be illegal is accessed, inadvertently or deliberately, this material will be reported to the appropriate agency immediately, e.g. the Internet Watch Foundation (IWF), CEOP and/or the police.

The school's network and school-owned devices will be appropriately monitored. All users of the network and school-owned devices will be informed about how and why they are monitored. Concerns identified through monitoring will be reported to the DSL who will manage the situation in line with the Child Protection and Safeguarding Policy.

All laptops both staff and pupil, are installed with SENSO for monitoring user use. JAMF is used to filter app and internet access on ipads. Physical monitoring of pupils is used when they are using the ipads.

The DSL will complete weekly checks of the monitoring system to ensure to ensure staff and children are using devices appropriately. Staff devices will be co

All staff will receive regular training on the operation and purpose of filtering and monitoring systems, including their role in safeguarding.

Personal devices connected to the school's network will be subject to the same filtering and monitoring standards to ensure consistent safeguarding measures.

Filtering and monitoring systems will undergo at least an annual review to assess their effectiveness and relevance.

Network security

Technical security features, such as anti-virus software, will be kept up-to-date and managed by ICT technicians. Firewalls will be switched on at all times. ICT technicians will review the firewalls on a fortnightly basis to ensure they are running correctly, and to carry out any required updates.

Staff and pupils will be advised not to download unapproved software or open unfamiliar email attachments and will be expected to report all malware and virus attacks to ICT technicians.

All members of staff will have their own unique usernames and private passwords to access the school's systems. Pupils in Reception and above will be provided with their own unique username and private passwords. Staff members and pupils will be responsible for keeping their passwords private. Passwords will have a minimum and maximum length and require a mixture of letters, numbers and symbols to ensure they are as secure as possible.

Users will inform ICT technicians if they forget their login details, who will arrange for the user to access the systems under different login details. Users will not be permitted to share their login details with others and will not be allowed to log in as another user at any time. If a user is found to be sharing their login details or otherwise mistreating the password system, the headteacher will be informed and will decide the necessary action to take.

Users will be required to lock access to devices and systems when they are not in use.

The SLT digital lead will be responsible for implementing appropriate network security measures in liaison with the DPO and DSL. Full details of the school's network security measures can be found in the Cyber-security Policy.

Emails

Access to and the use of emails will be managed in line with the Data Protection Policy, Acceptable Use Agreement, and the Pupil Confidentiality Policy and Staff and Volunteer Confidentiality Policy.

Staff and pupils will be given approved school email accounts and will only be able to use these accounts at school and when doing school-related work outside of school hours. Prior to being authorised to use the email system, staff and pupils must agree to and sign the Acceptable Use Agreement. Personal email accounts will not be permitted to be used on the school site. Any email that contains sensitive or personal information will only be sent using secure and encrypted email.

Staff members and pupils will be required to block spam and junk mail, and report the matter to ICT technicians. The school's monitoring system can detect inappropriate links, malware and profanity within emails – staff and pupils will be made aware of this. Chain letters, spam and all other emails from unknown sources will be deleted without being opened. DSL will organise an [annual](#) assembly where they explain what a phishing email and other malicious emails might look like – this assembly will include information on the following:

- How to determine whether an email address is legitimate
- The types of address a phishing email could use
- The importance of asking “does the email urge you to act immediately?”
- The importance of checking the spelling and grammar of an email

Any cyber-attacks initiated through emails will be managed in line with the Cyber Response and Recovery Plan.

Generative artificial intelligence (AI)

When deciding whether to use generative AI, safety will be the top priority. Any use of AI tools by staff and pupils will be carefully considered and assessed, evaluating the benefits and risks of its use in the school.

AI tools will only be used in situations where there are specified clear benefits that outweigh the risks, e.g. where it can reduce teacher workload, and the school will ensure that any use of AI tools comply with wider statutory obligations, including those outlined in KCSIE.

The school will carry out an AI Risk Assessment, which includes plans for mitigating against unauthorised use cases.

Pupils will only be permitted to use generative AI in the school with appropriate safeguards in place, e.g. close supervision and the use of tools with appropriate filtering and monitoring features in place.

For any use of AI, the school will:

- Comply with age restrictions set by AI tools and open access large language models (LLMs).
- Consider online safety, including AI, when creating and implementing the school's approach to safeguarding and related policies and procedures.
- Consult KCSIE to ensure all statutory safeguarding obligations and AI tools are used safely and appropriately.
- Refer to the DfE's [generative AI product safety expectations](#) and [filtering and monitoring standards](#).

The school will take steps to prepare pupils for changing and emerging technologies, e.g. generative AI and how to use them safely and appropriately with consideration given to pupils' age.

The school will ensure its IT system includes appropriate filtering and monitoring systems to limit pupils' ability to access or create harmful or inappropriate content through generative AI.

The school will ensure that pupils are not accessing or creating harmful or inappropriate content, including through generative AI.

The school will take steps to ensure that personal and sensitive data is not entered into generative AI tools and that it is not identifiable.

The school will make use of any guidance and support that enables it to have a safe, secure and reliable foundation in place before using more powerful technology such as generative AI.

Data protection and cyber-security

The school is aware of the data privacy and cyber-security implications that come with using generative AI tools, and will ensure that all AI tools are used in line with the school's Data Protection Policy and Cyber-security Policy. The school will follow the procedures in these policies to continue to protect pupils from harmful online content that could be produced by AI tools.

The school will use data anonymisation techniques, e.g. by using pseudonyms, to ensure that any pupil data processed through AI tools for administrative purposes is not identifiable.

Data audits will be carried out to ensure that AI tools are not capturing or processing personal data inadvertently.

Only authorised staff members will be permitted to use AI for data-related activities.

All staff will be made aware that generative AI tools are able to create believable content of all kinds, for example credible email scams requesting payment, and that the content AI produces may seem more authoritative and believable than usual scams. All staff will apply their best judgement and common sense to manage cyber-security risks effectively and ensure that the DfE's [cyber standards](#) are followed at all times.

The school will:

- Protect personal and special category data in accordance with data protection legislation.
- Be aware of intellectual property (IP) implications in line with the below section.
- Review and strengthen cyber security by referring to the DfE's cyber standards.
- Ensure that the school's response to cyber security breaches considers AI-specific issues, e.g. data leakage from AI-generated output.

- Be mindful that generative AI could increase the sophistication and credibility of cyber attacks.
- Ensure that pupils are not accessing or creating harmful or inappropriate content online, including through AI tools.
- Refer to the DfE's [Filtering and monitoring standards for schools and colleges](#) to ensure that the appropriate systems are in place.
- Be mindful of the data privacy implications when using AI tools and will take steps to ensure that personal and special category data is protected in accordance with data protection legislation.

If it is necessary to use personal and special category data in AI tools, the school will ensure that the tools comply with data protection legislation and existing privacy policies to protect the data.

The school will be open and transparent whilst ensuring that data subjects understand their personal or special category data is being processed using AI tools.

Intellectual property (IP) implications

The school will ensure that all uses of generative AI tools adhere strictly to IP laws and best practices.

The school will recognise the importance of being aware of the IP implications when using these technologies, and only use IP materials to train AI if explicit permission from the copyright holder has been granted, or if a statutory exception applies.

Materials created by pupils and teachers will be recognised as copyright material, provided they meet the statutory standard for copyright. This standard is considered to be low and does not depend on the quality of the work produced.

The school will understand that copyright law is distinct from data protection law, and any consents or data processing agreements for personal data are separate from issues of compliance with copyright legislation.

The school will remain mindful that many free-to-access generative AI tools may use the inputs submitted by users to further train and refine their models. In contrast, certain paid tools may allow users to opt out of their inputs being used for such purposes. The school will evaluate the terms of use for each AI tool to ensure compliance with copyright and intellectual property laws.

Examples of Original Creative Work

The school will recognise the following as examples of original creative work that may be protected by copyright:

- Essays, homework, or any other materials written or drawn by a pupil (not including responses to multiple-choice questions, as these are less likely to constitute copyright work).

- Lesson plans created by a teacher.
- Prompts entered into generative AI tools that produce substantial content.

Permission to Use

The school will not allow or cause pupils' original work to be used to train generative AI models unless explicit permission is obtained, or an exception to copyright applies. Permission will need to be granted by:

- The pupil, as the copyright owner.
- The pupil's parent or legal guardian, if the pupil is unable to consent independently.

The school will ensure that any use of pupil or teacher-created content is handled with full compliance with copyright laws. Where exceptions to copyright may apply, the school will seek legal advice to ensure lawful usage.

Secondary Infringement Awareness

The school will be vigilant in avoiding secondary infringement of intellectual property. This could occur if AI-generated products are trained on unlicensed materials and are then used in educational settings or published more widely—for example, on the school's website.

The school will acknowledge the following as potential risks associated with secondary infringement:

- Publishing a policy generated by an AI tool that used input derived from another school or college's policy without obtaining permission.
- Using an image created by an AI tool that was trained on copyrighted material without the copyright holder's consent.

The school will put measures in place to verify the intellectual property rights of any AI-generated outputs before their use in public or educational contexts.

Using AI tools

The school will ensure that AI tools are used appropriately to achieve the following aims:

- To reduce workload
- To free up teachers' time
- To assist with the production of high-quality and compliant administrative plans, policies and documents
- To support the teaching of a knowledge-rich computing curriculum
- To teach pupils:

- How to use emerging technologies safely and appropriately.
- About the limitations, reliability and potential bias of AI tools.
- How information on the internet is organised and ranked.
- How online safety practices can protect against harmful and misleading content.

To identify and use appropriate resources to support their education, including age-appropriate resources and preventing over-reliance on a limited number of tools or resources.

Whilst recognising that AI tools can be used appropriately and with benefit to teaching and learning, the school will keep in mind that the content produced by AI tools can be:

- Inaccurate.
- Inappropriate.
- Biased.
- Taken out of context and without permission.
- Out of date or unreliable.

AI tools will not be used for educational resources without appropriate fact-checking and quality assurance measures in place.

Where AI tools are used to produce administrative plans, policies and documents, all staff members will understand that the quality and content of the final document remains the professional responsibility of the staff member who produced it. Staff members using AI tools to create documents will not assume that AI output will be comparable with a human-designed document that has been developed in the specific context of the school.

Pupils will be made aware of the importance of referencing AI tools correctly when using AI tools to produce work, especially if the work is for an assessment, in order to allow teachers and assessors to review how AI has been used and whether it was appropriate. Pupils' references to AI sources will show the name of the AI source and the date that the content was generated.

Pupils will retain a copy of the questions and AI generated content for reference and authentication purposes in a non-editable format, e.g. a screenshot. Pupils will also provide a brief explanation of how AI tools have been used.

When using AI tools, staff and pupils will ensure that any content produced is scrutinised and cross-checked for its appropriateness and accuracy.

Staff members will be aware that AI tools return results based on the dataset it has been trained on – it may not have been trained on the national curriculum and may not provide results that are comparable with a human-designed resource developed in the context of the national curriculum. Staff members will be mindful of this in their teaching and marking of pupils' work.

Pupils and staff members will be reminded that using AI tools cannot replace the judgement and deep subject knowledge of a human expert. Staff members will stress the importance of pupils acquiring their own knowledge, expertise and intellectual capability rather than relying on AI tools in their work.

The school will not allow or cause pupils' original work to be used to train AI tools unless it has appropriate consent or exemption to copyright. Consent will be sought from students over 18; however, for pupils under 18, consent will be sought via their parents.

Safeguarding and AI

The school acknowledges that generative AI tools can be used to produce content that is dangerous, harmful, and inappropriate. The school will follow the procedures set out in the Child Protection and Safeguarding Policy and the Online Safety Policy to ensure that pupils are not able to access or be exposed to harmful content.

Pupils will be taught about the risks of using AI tools and how to use them safely. Pupils will be made aware of how to report any concerns or incidents involving generative AI, and who to talk to about any issues regarding the use of AI tools.

The school will engage with parents via [letter](#) to inform them of the safeguarding risks that come with using AI tools, and how the school is protecting pupils online. The school will ensure that parents are aware of who to speak to about any concerns or issues regarding the use of AI.

The school will ensure that the appropriate filtering and monitoring systems are in place to protect pupils online, following the DfE's [filtering and monitoring standards](#).

All staff members will receive training on the safe use of AI as part of their online safety training, which is regularly updated.

Teaching pupils about the safe use of AI

Teaching about the safe and appropriate use of AI will ensure that pupils benefit from a knowledge-rich curriculum which enables them to become well-informed users of technology and understand its impact on society. Pupils will gain strong foundational knowledge which ensures they are developing the right skills to make the best use of AI tools.

The school will:

- Prepare pupils for changing workplaces.
- Teach pupils how to use emerging technologies, including AI tools, safely and appropriately.
- Raise awareness of the limitations, reliability and potential bias of AI tools.
- Help pupils to understand how information on the internet is organised and ranked.

- Include online safety teaching in the curriculum and how to protect against harmful or misleading content.
- Raise awareness and understanding of protecting intellectual property rights.
- Encourage the safe and responsible use of digital content.
- Teach about the impact of technology, including disruptive and enabling technologies.
- Include teaching about how computers work, connect with each other, follow rules and process data in the curriculum.

Pupils will be supported to identify and use appropriate resources to support their ongoing education through the use of age-appropriate resources, which may include AI tools, whilst preventing over-reliance on a limited number of tools or resources.

The school website

The headteacher will be responsible for the overall content of the school website – they will ensure the content is appropriate, accurate, up-to-date and meets government requirements.

The website will be managed in line with the School Website Policy.

Use of devices

Staff members and pupils will be issued with school-owned devices to assist with their work, where necessary. Requirements around the use of school-owned devices can be found in the school's Device User Agreement.

The use of personal devices on the school premises and for the purposes of school work will be managed in line with the Staff ICT and Electronic Devices Policy.

Remote learning

All remote learning will be delivered in line with the school's Remote Education Policy. This policy specifically sets out how online safety will be considered when delivering remote education.

Monitoring and review

The school recognises that the online world is constantly changing; therefore, the DSL, ICT technicians and the headteacher conduct termly light-touch reviews of this policy to evaluate its effectiveness.

The governing board, headteacher and DSL will review this policy in full on an annual basis and following any online safety incidents.

The next scheduled review date for this policy is September 2025.

Any changes made to this policy are communicated to all members of the school community.
